PurusMat Frames are designed to be used with the Purus Mat to create a system that is easy to use in any critical area. This system is ideal for any area that does not allow direct adhesion to the flooring surface. The PurusMat Frames are constructed of a hard, rigid, polystyrene base material combined with a non-skid backing that holds the mats in place on almost any surface.

Non-skid backing:

- Protect floors from adhesive residue from the Purus Mats
- Reduces the risk of slips and falls
- Non-Slip made from Polymer Coated polyester textile
- Naturally antimicrobial, mold and mildew resistant

PurusMat Frames come in a variety of sizes to fit most standard cleanroom mat sizes. The frames are available in white or black* and can be custom printed. The frames are sold alone and do not come with a mat.
