Distributor pure11

Chempump CP 40 ESD One Touch

pure[11]-Nr. : 1106395 , Marke : Distributor pure11

Eigenschaften

- Material Packmittel & Entsorgungsbeutel: HDPE
- ESD-Eigenschaften (nach EN 61340/EN 16350)
- Fassungvolumen in Liter: 0 L
- Farbe: Blau
- Aufdruck: Ohne
- Marke: Distributor pure11

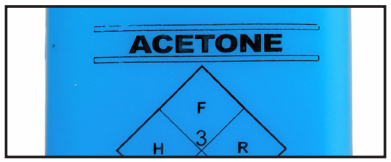
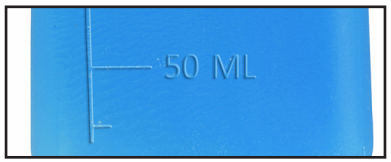
One-Touch Pump

Pure-Touch Pump

Pure-Take Pump





Note: Printed bottles eliminate the need for additional labels - custom printing available.

6 oz. bottles include measurements on one side to see how much fluid is left in the container

Description

- HDPE durAstatic™ Bottles are dissipative and are designed to protect your valuable static sensitive printed circuitry
- No migratory additives - reduces the chance for contamination from the bottle
- Embossed with ESD protective symbol, allowing people to immediately know the bottle is ESD protective
- Long lasting dissipative properties:
  Rtt: 1 x 10^4 to <1 x 10^{11} ohms tested per ANSI/ESD STM11.12
  <2 second charge decay, tested per IEC 61340-5-1:1998
- Dispenses approximately 2cc of liquid with each pump
- Genuine Menda “dish-type” liquid dispenser pumps and bottle one-handed operation dispensing small amount of liquid into top dish
- Genuine Made in the United States of America Menda pump and bottle - accept no substitutes

“It should be understood that any object, item, material or person could be a source of static electricity in the work environment. Removal of unnecessary nonconductors, replacing nonconductive materials with dissipative or conductive materials and grounding all conductors are the principle methods of controlling static electricity in the workplace, regardless of the activity.” (ESD Handbook ESD TR20.20 section 2.4 Sources of Static Electricity)

Chemical Resistance Classification:
E – 30 days of constant exposure to reagent causes no damage
G – Little or no damage after 30 days of constant exposure to the reagent
F – Some effect after 7 days exposure to the reagent. Solvents may cause swelling and permeation losses
N – Not recommended for continuous use

First letter of each pair applies to conditions at 20°C (68°F); the second to those at 50°C (122°F).
