Kimtech™ M3 Certified Pleat-Style Face Mask

Designed to **reduce contamination**

Excellent **bacterial and particle filtration**

Flexible and comfortable fit
with earloops or ties

Kimtech™ M3 Certified Pleat-Style Face Masks

offer advanced levels of comfort and safety in the cleanroom, providing seamless protection when and where it counts. Suitable for use in ISO 3 or higher cleanroom environments and laboratories, the pleat-style face masks are made from a protective low-lint polyethylene film outer layer and are suitable for non-sterile applications.

Our certified M3 face masks are specially designed to reduce the risk of contamination while offering greater comfort when compared with other traditional pleated design masks. They include flexible fit features, such as our comfortable and easy-to-use earloops or soft ties with a fully enclosed bendable

nosepiece, which ensure the wearer can focus on work instead of their protective equipment. The masks are free of latex and silicone, reducing the potential of skin irritation. They have excellent bacterial and particle filtration combined with good breathability.

These double bagged face masks are popular for a variety of environments, including those for semiconductors, disk drives, data storage and integrated circuits. In addition, our M3 face masks are manufactured in an FDA-compliant facility to ensure safety and regulatory compliance and are provided with all relevant supporting technical information.

Kimtech™ M3 Certified Pleat-Style Face Mask
