# Polynit Wipes

Polynit Wipes are made of 100% knitted textured polyester with knife cut edges for a very soft wipe. The soft edge is ideal for use on surfaces which are vulnerable to scratching. Polyester wipes are chemically resistant and exceptionally low in particles and fibers. An interlock knit creates a durable fabric, the addition of a periodic additional stitch of a no-run interlock knit prevents the fabric unraveling creating an even more durable fabric with strong edges.

The wipes are laundered and packaged in a cleanroom. They have good sorbency with solvents and are abrasion and chemical resistant.

A validated sterile version is available.
