Amplitude™ Optic Wipes

Amplitude™ Optic wipes are 100% nonwoven cellulose. The wipe consists of long staple fibers which are wet laid in a paper making process to form an extremely clean sheet. It features very low levels of extractables and only moderate particle generation. The wipe has a nonabrasive surface texture. The wipes are both absorbent and optical grade.

These nonwoven wipes were specifically designed for the delicate cleaning of optical products and microminiature electronic components. It can also be used as a lining for cleanroom surfaces and trays.
